HARMONIUMS.—W. E. EVANS, the Original Inventor and Manufacturer of Harmoniums in England, respectfully draws the attention of intending purchasers to his Unrivalled Instruments, in which he has recently introduced several important patented improvements. Amongst which may be specially mentioned the "double-action expression wind movement," by means of which the wind is supplied with half the usual exertion, and the most perfect expression realised; thus superseding the use of the "Expression Stop," so difficult of management in all Harmoniums. The advantage to purchasers is obvious, in selecting an instrument of a manufacturer whose whole life has been devoted to perfecting the Harmonium, and who finishes with his own hand every Instrument that leaves his Manufactory; whilst the prices charged are no higher than those of other makers. Every Instrument is Warranted. The undermentioned

THE "EVANS" IMPROVED HARMONIUMS are remarkable for the entire absence of the nasal and reedy tone which has hitherto been the great impediment to the general adoption of the Harmonium in private houses; whilst the sluggishness of speech, another great defect in most Harmoniums, has been entirely overcome by W. E. Evans' improvements.
